

ENCOMP SOL

Integrating Information for Public Safety.™

Hazardous Materials Management System (HMMS)

1

Businesses use Encomp Sol's web based system to easily compile HazMat and emergency information.

2

Compliance documents are automatically prepared to meet all federal, state, and local reporting requirements.

3

Emergency response personnel use the internet based system to access critical information in an emergency.

Functionality

- Centralizes information for hazardous materials and site emergencies.
- Meets requirements for federal, state, and local reporting.
- Provides HazMat information to first response and facility personnel.
- Provides full access to HazMat information during an emergency.

Benefits

- Reduces costs of data management.
- Reduces liability in any emergency.
- Reduces staff time spent managing reporting requirements.
- Reduces company down-time in an emergency.
- Saves lives, property, and the environment.

Features

- Web-based ASP solution - no boxed software to purchase or upgrade.
- Provides information to multiple users.
- System is hosted in a class-A secure data center.
- Data available 24/7/365 in a centralized location.
